

IN THE SPECIFICATION

Please amend the specification, as follows:

[0038] The operator terminal 32 manages and controls the control unit 30. The control unit 30 previously stores a built-in channel setting program and executes the program in initialization [[and]] under the control of the operator terminal 32, to automatically search peripheral access point devices, find an optimal channel and set a channel number. The connection unit 34 is connected to the distribution system 12 of FIG. 1 under the control of the control unit 30. The wireless transmission/reception unit 36 transmits/receives (transmits and/or receives) signals to/from (to and/or from) the stations or access point devices of FIG. 1.
